Summary

Hi, I'm Jose. I am a **Computer Science** graduate based in Dallas, Texas seeking a position as a **Product Designer**. With over a **decade of experience working in agile environments**, I've successfully overseen countless projects from the initial planning & design stages all the way to the first stages of development.

Education

Texas A&M University — College Station, Texas — August 2013 — August 2018
Bachelor of Science — Computer Science
Minor — Graphic Design (UI/UX)

Experience

JumpGrowth — Lead UX Designer — September 2025 — Present

- Currently in charge of designing a role-based B2B SaaS subscription platform for a government-funded chemical safety organization that helps clients assess the safety and efficacy of pharmaceuticals and chemicals, specifically those used by women in labor.
- In charge of wireframing and prototyping every workflow for every specific role in this service as well as creating and maintaining a consistent design system for the entire platform.

Copart — Senior UX Designer — February 2020 — February 2025

- Lead a team of designers for five years at Copart, an online vehicle auction platform that specializes in the sale of used, salvage, and insurance vehicles.
- Was in charge of designing and maintaining the Copart UI Library, the company's first design system, created by my design team and I back in 2022.
- Drove standardization across every internal application inside Copart's back-end portal with Copart UI.
- Maintained a curated library of ready-to-go components for the front-end developers.

WebCE — Lead UX Designer, Web Master — July 2019 — December 2019

- Designed a web-based LMS (Learning Management System) from the ground up for WebCE, a leading provider of online Continuing Education courses in North America.
- Was also one of the three webmasters for WebCE, helping with front-end development as well as managing the LifterLMS back-end software.

OTS Solutions — Lead UX Designer, Web Master — August 2018 — March 2019

- Designed a number of mobile applications and responsive WordPress websites for various clients.
- Websites had to be both fully responsive and WCAG 2.1 compliant before pushing them to production.
- Was also in charge of designing, developing, and managing the OTS Solutions website.

StudyOnBoard — Full Stack Developer — December 2013 — May 2014

- Designed and developed the company website for a small startup based in College Station, Texas.
- StudyOnBoard offered college students a cloud-based, collaborative environment where students could work together in real time—a study room based entirely online.
- Truly a startup ahead of its time (probably the reason it was purchased and acquired by Google).

Skills

Designer — Figma, Sketch, Adobe Creative Cloud
Developer — WordPress, CSS, JS, ReactJS, C++
Artificial Intelligence — Claude, Gemini, ChatGPT
